The applicant broadened the independent claims 46, 69, 79, & 85 by deleting the limitation that was submitted as of Sept 19, 2006. The applicant deleted " wherein a bit received from the mobile station on a reverse packet data control channel indicates whether the mobile station has enough power and data to increase its data transmissison rate on a reverse packet data channel. This amendment does not just add dependent claims previously forgotten but also broadens the independent claim. The examiner suggests that the applicant go back to the allowed baseline of claims and add these dependent claims in order for them to be considered.
